Art Unit: 1752

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-4, 6-11, 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Oda et al. '534. Oda et al. (example 2) discloses positive working compositions for lithographic plates comprising octyl phenol novolak resin, other aqueous alkali soluble novolak resins and IR absorbers with the resins having concentrations as required by the instant claims.

2. Claims 5 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Irving et al. and Masuda et al. are cited of interest as disclosing alkyl novolak resins in photoresists. The prior art cited by applicants has been considered.
